

ABDULSALAM KHALIFA OMEIZA

Port-Harcourt, Rivers State, Nigeria, (+234) 8153714151 khalifabdul96@gmail.com.

GitHub repositories: <https://github.com/khalifaomeiza>

PERSONAL STATEMENT

Resourceful and analytical Chemical Engineering graduate with practical experience in process design, drilling operations, and engineering optimization. Demonstrated success during an internship at Port Harcourt Refining Company, contributing to operational safety, flow design, and predictive modeling. Backed by certifications in ISO standards and process safety ethics, I bring a well-rounded technical foundation and strong problem-solving abilities to drilling engineering and planning roles.

PERSONAL DETAILS

Date of Birth: 13th March 1996

State of Origin: Kogi State

State of Residence: Rivers State

EDUCATION

B.Eng. Chemical Engineering, Second Class Upper division

(4.47/5.0)

2021

Federal University of Petroleum Resources, Effurun, Delta State, Nigeria

Relevant Coursework: Process Simulation & Optimization, Thermodynamics, Reaction Engineering

Research: Applied analytical skills to study corrosion inhibitors, enhancing material durability.

Co-authored Research: Modelling, Simulation and Optimization of a Fluidized Bed Membrane Reactor for Hydrogen Production by Steam Reforming of Natural Gas.

Design Project: Developed a process for producing 1000 tonnes/year of Biodiesel from Neem seeds.

RELEVANT EXPERIENCE

Field Joint Coating (FJC) Assistant, Total IKIKE

March 2022 – July, 2022

Deltatek Offshore & Netco Consortium (Contract)

- Evaluated and managed technical documentation for the Ikike field development project, ensuring 100% compliance with industry standards and regulatory requirements.
- Performed daily on-site inspections, identifying and mitigating potential hazards, resulting in improved adherence to safety protocols.
- Optimized project schedules by updating Gantt charts, collaborating with cross-functional teams to align deliverables and meet deadlines ahead of schedule.
- Supported quality control processes, including coating inspections, duct assessments, surface roughness evaluations, Wet Film Thickness (WFT) testing, and Heat Shrink Sleeve (HSS) application, maintaining a defect rate below 2%.
- Liaised with engineering and procurement teams to resolve coating material discrepancies, reducing downtime.
- Conducted post-application audits to verify coating integrity, ensuring adherence to client specifications and ISO 9001 standards.

Engineering Projects & Technical Design

2020 – Feb., 2024

Freelance Chemical Engineering Tutor Assistant (Part-time)

- Developed the design calculations for a Shell & Tube Heat Exchanger (E-105) in cooling a Dimethyl Ether (DME) stream from 250°C to 140°C using Kern's design methods. Obtained parameters for heat transfer area, tube layout design, baffle spacing, number of tubes, tube side & shell side velocity, baffle spacing, heat transfer coefficient, etc. The design economics was justified as feasible as the values obtained for costing using Sinnott & Towler's Approach gave an impressive result against the cost of Heat Duty.
- Designed Piping & Instrumentation Diagrams using Microsoft Visio and ChemCAD software to produce DME Biodiesel from Neem seeds.
- Drafted a Process Flow Diagram for producing Mono Ethylene glycol from Ethanol. Modified the initially proposed design by using Heat Exchanger Networks, which theoretically improved the energy integration process.
- Developed solutions to complex mathematical and chemical engineering problems that are simplified to facilitate understanding during tutor sessions.
- Drafted solutions to exam past questions and home-works between 1st to 3rd-year Chemical Engineering modules such as Transport Phenomena, Separation Processes, Material Balance, Advanced Chemical Reaction Engineering, Chemical Thermodynamics, Chemical Engineering Design, etc., as well as 1st and 2nd year Math modules in differentiation, integration, statistics, Numerical Methods and Laplace Transform.

Undergraduate Internship, [Students Industrial Work Experience Scheme (SIWES)]

2019

Oil Movement Intern

Port Harcourt Refining Company (PHRC), Alesa-Elеме, Rivers State, Nigeria

- Offered data-driven recommendations aligned with the overall strategies of the Oil Movement Section and prioritised process safety improvements and initiatives.

- Incorporated solutions that met various challenges in operational procedures, such as deducing ullage rather than innage for highly viscous products.
- Utilized C programming in designing a program that computes the blending ratios of blending components based on their Research Octane Number (RON). The algorithm was designed to allow ease and accuracy in computing blending fractions, volumes and RON.
- Minimized inventory discrepancies by accurately analysing custody transfer volumes, obtaining tank gauges before and after commissioning of product transfer, and inspecting storage facilities for leakages, roof integrity, and the integrity of roof secondary sealing systems.
- Analyzed all operating procedures, identified inefficiencies in existing processes and performed a visual assessment of containment bunds, storage facilities and products to evaluate conformance with the quality management standards of ISO 9001:2015.
- Carried out troubleshooting of the Servo Automatic Level gauge, ensuring roughly a 25% increase in optimal performance for all tank gauge systems.
- Implemented Excel-based models to forecast tank dewatering trends, achieving 90%+ predictive accuracy +90% in ascertaining product-water interface and Estimated Completion time (ETC).
- Designed Process Flow Diagrams (PFDs) for all operational areas of the Oil Movement Section (OMS) to allow employees and interns to draft the best action plan and encourage a more efficient workflow.

CERTIFICATIONS

- | | |
|--|-------------|
| • Certificate of Participation , TotalEnergies IKIKE Project Deltatek Netco Consortium. | July, 2022 |
| • Energy Transition (innovation towards a low-carbon future) , French Institute of Petroleum (IFP) in collaboration with Total Energies Foundation | April 2021 |
| • Certificate of Internship , Port Harcourt Refining Company Ltd. | Dec.2019. |
| • SACHe® Certificate program on Chemical Reactivity Hazard , AIChE | Aug., 2020 |
| • SACHe® Dust Explosion Certification , AIChE | April 2020 |
| • SACHe® Process Safety Ethics , AIChE | April 2020 |
| • Jobberman Softskill training Certification , Jobberman | Sept., 2020 |
| • Practical Industrial Process Gamification , Total Automation Concept Ltd. In alliance with Udemy. | June 2020 |
| • Basic Oil Spill Contingency Exercise Certification: Gamified Approach , Total Automation Concept Ltd. In alliance with Udemy | Nov. 2020 |
| • The COSHH Risk Assessor Certification , International Association of Chemical Safety, in alliance with the Knights of Safety and The Safer Chemical Initiative. | May 2020 |
| • The COSHH Hazard Communication Awareness , Int'l Association of Chemical Safety | May 2020 |
| • Spillage Response Awareness Training Certification , Int'l Association of Chemical Safety | May 2020 |
| • The COSHH and working in Confined space awareness , Int'l Association of Chemical Safety | July 2020 |
| • ISO 45001: 2018 Occupational Health and Safety Management System Awareness , The Knights of Safety in partnership with Sevron. | Aug. 2020 |
| • ISO 9001: 2015 Quality Management System Awareness , The Knights of Safety in partnership with Sevron. | Aug. 2020 |
| • ISO 50001: 2018 Energy Management System Awareness , The Knights of Safety in partnership with Sevron. | Aug. 2020 |

ADDITIONAL EXPERIENCE

Software Engineer (Jnr.)

Sept., 2023 – Till date

PayfiHQ, Toronto, Ontario, Canada

- Implemented effective debugging strategies to identify edge-cases in feature development, resulting in fewer software defects and increased reliability.
- Developed and maintained responsive frontend features using React, TypeScript, and SCSS, ensuring seamless user experiences across devices and browsers, aligning with web accessibility standards.
- Wrote clean, efficient JavaScript and TypeScript code, integrating RESTful APIs via Apollo GraphQL and Postman for testing, improving endpoint reliability by 20%.
- Optimized frontend performance using Webpack and npm, achieving a 10% reduction in load times for critical application features.
- Demonstrated adaptability by swiftly learning and applying new technologies, tools, and methodologies as needed throughout the internship period.
- Enhanced teamwork abilities through regular collaboration with cross-functional teams including designers, QA engineers, and

project managers.

- Assisted senior developers with debugging complex issues that arose during the product testing phase and deployment.
- Improved communication skills while presenting progress updates at daily team standups and maintaining clear lines of communication with colleagues.
- Implemented database queries on TablePlus using SQL and managed efficient data transport.
- Delivered high-quality code on time, contributing to overall project success.
- Collaborated with team members for successful completion of every product feature development, UAT and deployment to ensure software reliability before deployment to production environments.
- Studied corrections on code reviews from senior engineers to learn and grow professionally.
- Developed server-side logics in Typescripts to handle light-weight APIs.
- Troubleshoot and tested endpoints' migrations between repositories using Postman for test documentation, ApolloGraphQL explorer and Altair as alternatives, to detect bug and provide fixes where necessary.
- Utilized AWS SES to implements notifications across all product interfaces that necessitates user notification.

Tech Support, Intern

April, 2023 – Sept.,2023

Payfi (Payfinancials Technological Services Ltd.), Lagos, Nigeria

- Engineered responsive user interfaces using React, SCSS, and TypeScript, contributing to a 12% increase in user satisfaction scores.
- Conducted cross-browser testing for web applications, ensuring 98% compatibility across major platforms and reducing user-reported issues by 25%.
- Participated in agile sprint planning and retrospectives, improving team efficiency by 10% through process refinements.
- Debugged and resolved 50+ technical issues during product testing, minimizing downtime and enhancing user experience.
- Adhered to established coding standards and guidelines, promoting consistency across the codebase and ensuring seamless integration with other components developed by team members.
- Contributed ideas during brainstorming sessions about new features or improvements needed in existing applications based on client feedback or personal observations from user interactions with the software.
- Stayed up-to-date on industry trends, incorporating new technologies as appropriate to enhance product offerings continually.
- Refactored all role-based-permissions into categories and drafted a comprehensive documentation detailing all roles, available permission(s) and relevant permission descriptions.
- Engineered responsive user interfaces using React, SCSS, and TypeScript, contributing to a 12% increase in user satisfaction scores.
- Conducted cross-browser testing for web applications, ensuring 98% compatibility across major platforms and reducing user-reported issues by 25%.
- Participated in agile sprint planning and retrospectives, improving team efficiency by 10% through process refinements.
- Debugged and resolved 50+ technical issues during product testing, minimizing downtime and enhancing user experience.

TECHNICAL SKILLS

- Process Simulation: Aspen HYSYS, ChemCAD, MATLAB, Polymath
- Diagramming: Microsoft Visio, ChemCAD (PFD/P&ID)
- Programming & Modeling: C, SQL, Excel, Node.js
- Documentation & Safety: ISO Systems, Safety Ethics, Technical Writing

AWARDS/HONORS

- | | |
|--|------------------|
| • Graduated Top 2% , Dean's List, Federal University of Petroleum Resources | 2021 |
| • Excellent Leadership and Service , Muslim Students Society of Nigeria (MSSN), Delta State | 2020 |
| • Certificate of Internship , Port Harcourt Refining Company (PHRC), Ltd. | 2019 |
| • Academic Scholarship , Federal Scholarship Board, Nigeria | 2017-2019 |
| • Graduated summa cum laude , Sureway High School, Port Harcourt, Rivers state. | 2014 |

EXTRACURRICULARS

Poetry, Technical Writing, Mentorship, Scientific Research
